

Troubleshooting

I don't see the login link to the admin panel. How do I find it?

Armadillo v2.0 and Above

The dashboard can be directly accessed at this URL at any time:

`your-domain.com/rw_common/plugins/stacks/armadillo/index.php/`

Just replace `your-domain.com` with the domain of your website, and be sure to include the last forward slash `/` at the end.

Armadillo v1.7.5 and Earlier

You can always access the login page by visiting the "files/armadillo" sub-folder of whatever page you've added Armadillo to.

For example, if your Armadillo page is here:

`your-domain.com/armadillo`

The login page would be here:

`your-domain.com/armadillo/files/armadillo`

If you structure your site a certain way in RapidWeaver, and rename certain files/folders, RapidWeaver may rename the "files" folder to something else, like:

`your-domain.com/armadillo/pagename_files/armadillo`

The pagename portion will be the page name as specified in the Page Inspector.
