Settings & Configuration

Timezone

Please note: Only **admin** users can access the Settings tabs described below. If you do not see the Settings tab when logging in that means you do not have admin-level access.

After you've logged into Armadillo and navigated to the Settings tab, click on the plus sign (+) next to the section labeled **Timezone**. The Timezone setting affects the dates associated with the posts and pages you create in Armadillo. In this section you can change the timezone to match your current location.

Timezone

- From the drop down list choose the closest option to your current location.

After making your changes, be sure to click the large, green **Save Settings** button near the top of the page.
