User Guide

How do I create a blog?

There are two ways to do this in Armadillo:

- Use the "Auto Create" feature in the dedicated Armadillo Blog stack
- Login to the online Armadillo dashboard, and create one via the "Posts" tab

If you use the "Auto Create" feature, be sure to enter a unique number for the "Content ID" in stack settings. Armadillo will then create a blog with the ID that you specify - assuming there is not already a blog (or other piece of content) with that ID in the Armadillo database.

Unique solution ID: #1034
